

Manual, Assembly instruction: Brodit 213069

Mount for monitors with a hole underneath for thumb screw attachment (1/4"-thread). With tilt swivel.

Fits screens with a hole underneath for thumb screw attachment (1/4"-thread). The screen mount can be attached onto the ProClip Mounting Platform or any other surface. Fits screens with a hole underneath for thumb screw attachment (1/4"-thread). The screen mount can be attached onto the ProClip Mounting Platform or any other surface.

1. Loosen the screw in the center of the screen mount so you get two parts, one face plate and one attaching part (the smallest part). Place the attaching part onto the ProClip.

2. Screw the attaching part into place with the enclosed screws.

2. Place the face plate onto the attaching part so the holes in the pivot joint fit. Screw the face plate onto the attaching part. Note that the face plate will be harder/looser to tilt and swivel depending on how tight you screw on the screw.

3. The screen mount is in place.
