

Manual, Assembly instruction: Brodit 215868

Adjustable MultiStand. Fits devices with height 180-230 mm. Mounting adapter and screws included. Black.

1.)

2.)

3.)

4.)

Please read all of the instructions and look at the pictures before installing.

1. Place the mounting adapter into desired position and screw it into place with the enclosed screws.

2. Place the MultiStand over the mounting adapter and slide it downward into place.

3. To place the device in the MultiStand: Place the upper part of the device into the upper part of the MultiStand. Press the device upward/forward so the top part of the MultiStand slides upward. Press the lower part of the device forward into the MultiStand. For a more secure fit: Press the top part of the MultiStand downward and lock it into position by tightening the wingnut on the back side. To remove the device from the MultiStand: Loosen the wingnut on the back side. Press the device straight upward so the top part of the MultiStand slides upward. Pull the lower part of the device toward you and slide the device downward and out of the MultiStand.

4. The MultiStand is in place.
