

Manual, Assembly instruction: Brodit 216267

Hub mount for holders with USB-Host function. Hub with three USB-A ports with USB-Host function and one Ethernet port.

Read all of the instructions and look at the pictures before installing. Please note: The Hub mount can be placed on either side of the holder.

1. Loosen the screws to demount the tilt swivel. Turn the holder upside down, place the mount over the holder so that the screws fit into the hole. The mount can be mounted on the other side, by loosening the screws and turning the plate. Place the mount over the holes and fasten it with the enclosed screws.

2. To attach the cable: Attach the cable to the device. Place the lid over the cable and screw it into place with the enclosed screws.

3. Attach the cables: Connect the cable in the Hub.

4. The mount is in place.
