3.)

4.)

Please read all of the instructions and look at the pictures before attaching the holder. Connect to a 2 A fuse holder and fuse inline with the Red wire close to the power source. Route the cable from the holder into the vehicle dashboard and secure the charger unit in place. Ensure the charger unit is securely mounted behind the dashboard in a well ventilated area that does not get hot! Route the power cable from the charger unit to the power supply source in the vehicle and connect as follows: 1. Connect the White wire to a Negative Ground connection of the vehicle or the vehicle chassis. 2. Connect the Red wire to a 12 Volt power supply in the vehicle that is controlled by the ignition switch of the vehicle. Attaching the holder: 1. To adjust the holder for your device: Loosen the screws on the front side of the holder, so the sides of the holders can be adjusted. Place the device in the holder and press the sides together so the device is firmly in place. Tighten the screws on the front side of the holder. 2. Loosen the screw in the center of the holder so you can remove the tilt swivel attaching plate on the back. Place the attaching plate onto the desired position. Screw the attaching plate into place with the enclosed screws. 3. Place the holder over the attaching plate so the screw fits in the hole in the tilt swivel. Screw a few turns on the screw, just so the thread starts to pull. Pull the holder toward you and hold it slightly tensed, in the same time tighten the screw so the holder is pulled toward the tilt swivel. Tighten the screw firm at first, then loosen it a bit so the holder is firmly in place, but still can be adjusted. NOTE! It is important to slide the device STRAIGHT DOWNWARD into the holder, and to slide it STRAIGHT UPWARD out of the holder. 4. The holder is in place.
