

Manual, Assembly instruction: Brodit 635999

Console mount

1.)

2.)

3.)

4.)

Please read all of the instructions and look at the pictures before attaching the ProClip mount. It is important to install the mount first: any device holder + equipment is to be attached after the mount is in place. This mount consists of two parts: A mount and a faceplate.

1. Use the enclosed alcohol pad to clean the area where the mount will be installed. Peel off the adhesive tape cover. Place the mount just next to the rise in the console trim. Press the upper edge into the gap in the console accent trim.

2. Press the included Gap Opener (Spaltöffner)s into the gap in the console sidewall, to widen the gap on each side of the mount. Press down on the top of the mount, and in on the bottom of the mount, until the lower edge snaps + clips into the gap. Pull out the Gap Opener (Spaltöffner)s.

3. Place the included locking washer into the recess on top of the mount. Place the faceplate onto the mount. Adjust the faceplate into the desired angle. Attach the faceplate to the mount with the included screw.

4. The ProClip mount is in place.
