

Manual, Assembly instruction: Brodit 836048

Console mount

1.)

2.)

3.)

4.)

Please read all of the instructions and look at the pictures before attaching the ProClip mount. It is important to install the mount first: any device holder & equipment is to be attached after the mount is in place. This mount consists of two parts: a mounting bracket and a mounting plate. The mounting plate can be attached at any desired angle.

1. Hold the mounting bracket in the position where it is to be installed. Place the mounting plate on top of the mounting bracket and turn it into desired position with respect to the device/equipment to be installed. Press the parts together to keep the chosen position. Attach the mounting plate onto the mounting bracket with the enclosed screws.

2. Use the enclosed alcohol pad to clean the area where the mount will be installed. Peel off the adhesive tape cover. Hook the upper edge of the mount over the center console frame. Pull the lower part of the mount out from the center console without touching the padded sidewall. Press the right part toward the console sidewall and hook the lower edge of the mount into the gap in the lower section of the console sidewall.

3. This mount can also be installed on the left side of the center console.

4. The ProClip mount is in place.
