

Manual, Assembly instruction: Brodit 836088

Console mount

1.)

2.)

3.)

4.)

Please read all of the instructions and look at the pictures before attaching the ProClip mount. It is important to install the mount first: any device holder & equipment is to be attached after the mount is in place. This mount consists of two parts: A larger part with a mounting plate and a smaller mounting part.

1. Place the mounting plate part so the right edge is in the opening in the right console wall, placed under and along the frame.

2.Place the mounting part onto the right edge of the plate part so the holes match. Attach the included screws so the parts are held in place, but do not tighten the screws yet.

3. Adjust the position of the mount so the curved top of the mounting part matches the console side shape. Tighten the screws so the mount is properly in place.

4. The ProClip mount is in place.
