

Manual, Assembly instruction: Brodit 836128

Console mount

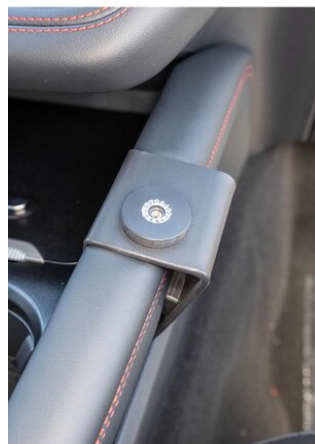

1.)

2.)

3.)

4.)

Please read all of the instructions and look at the pictures before attaching the ProClip mount. It is important to install the mount first: any device holder + equipment is to be attached after the mount is in place. This mount consists of two parts: a mount and a face plate.

1. Align the mount with the edge of the accessory tray. Press the upper edge into the gap between the right console inner wall and the console top panel. Press down on the top of the mount and in on the bottom of the mount, so the lower edge hooks under the bottom of the padded console sidewall panel.

2. Slide the mount forward to increase the tension and secure the mount in place.

3. Place the locking washer into the recess on top of the block. Place the faceplate over it and angle as desired. Secure the faceplate to the mount using the included screw.

4. The ProClip mount is in place.
