

Manual, Assembly instruction: Brodit 836131

Console mount

1.)

2.)

3.)

4.)

Please read all of the instructions and look at the pictures before attaching the ProClip mount. It is important to install the mount first: any device holder + equipment is to be attached after the mount is in place. This mount consists of two parts: a faceplate and a mount.

1. Use the enclosed alcohol pad to clean the area where the mount will be installed. Peel off the adhesive tape cover. Align the edge of the mount with the front edge of the cup holders. Hook the upper edge of the mount over the console edge. Press down on the top of the mount until the lower edge hooks + clips under the edge of the console side panel. Press in on the lower edge to ensure it is fully in place.

2. Place the included locking washer into the recess on top of the mount. Place the faceplate onto the mount. Adjust the faceplate into the desired angle. Attach the faceplate to the mount with the included screw.

3. The mount can also be attached on the drivers side on the console.

4. The ProClip mount is in place.
