

Manual, Assembly instruction: Brodit 836198

Console mount

1.)

2.)

3.)

4.)

Please read all of the instructions and look at the pictures before attaching the ProClip mount. It is important to install the mount first: any device holder & equipment is to be attached after the mount is in place. This mount consists of three parts: A mount, a top part and a faceplate.

1. Align the side of the mount centered on the accessory cubby. Press the lower edge of the mount into the seam between the console and the flooring. Rotate the mount side upward. The lower edge will draw further into the seam and hook into place.

2. Place the top of the mount onto the console frame so the screw holes align. Use the included screws to secure the mount and the top together.

3. Place the included locking washer into the recess on top of the mount. Place the faceplate onto the mount. Adjust the faceplate into the desired angle. The faceplate may be installed for use by the driver or passenger. Attach the faceplate to the mount with the included screw. **4.** The ProClip mount is firmly in place.
